

Press Release

Infotech registered in Australia

Hyderabad, India – April 11, 2005 Infotech Enterprises Limited (BSE: INFOTECENT, NSE: INFOTECENT), a global GeoSpatial, Design Engineering and Software services & solutions company announced today that the company is now registered for business in Australia with Australian Security Investment Commission. This allows trading locally participating in the government tenders and local bids directly.

Commenting on the achievement a company official said “This registration that was obtained in under 3 weeks will allow us to process long term work permits and help us establish greater presence onsite in Australia”.

Infotech also announced the opening of their branch office in Melbourne to augment business development in Australia.

About Infotech Enterprises

Infotech Enterprises is a twelve -year old, 3000 employee software services company with core competencies in the areas of GIS, engineering design and IT services. The company specializes in software services and solutions for manufacturing, utilities, telecommunications, transportation, retail, financial services, geotechnical and local government markets.
