

## Press Release

### SP AusNet selects Infotech for Geospatial Data Maintenance Services

**Hyderabad November 10, 2005** : SP AusNet, an amalgamation of the former TXU Networks and SPI PowerNet in Australia, has selected Infotech Enterprises, India's leading geospatial services company, to provide data maintenance services for their gas and electricity network assets under a two-year contract.

Infotech operates the data maintenance centre for SP AusNet from its facilities in Melbourne, Australia. The company has been consistently meeting the aggressive performance criteria set down by SP AusNet in the initial months of project execution.

BVR Mohan Reddy, Infotech's Chairman and CEO, said: "We are delighted to be chosen by SP AusNet for this significant contract which represents an important milestone for Infotech's business in Australia. By successfully proving our onshore production capability, we now offer a greater choice of outsourcing options that deliver operational and cost-saving benefits for our customers."

The SP AusNet engagement reinforces Infotech's presence in the utility markets in Australia which also includes customers like Origin Energy and Citipower.

#### **About SP AusNet:**

SP AusNet, a wholly-owned subsidiary of Singapore Power plays a vital role in the energy supply industry of Victoria, Australia. It is a newly formed business that is made up of the former SPI PowerNet's electricity transmission assets and the former TXU Australia's gas and electricity distribution assets.

#### **About Infotech**

Founded in 1991, Infotech Enterprises ([www.infotechsw.com](http://www.infotechsw.com)) is a leading provider of geospatial and engineering design services to the utilities, telecom, transportation, government, and manufacturing industries worldwide. Infotech currently employs over 3300 resources across 18 global locations and is certified to CMMi 5, ISO 9000 and BS7799 standards. A public company, Infotech has equity participation by Tele Atlas and United Technologies Corporation.
